## Experience

---

### Arex Digitals Web Developer Agency

May 2023 - Current

Frontend Engineer

- I collaborated closely with a dynamic team to create responsive websites using HTML, CSS, and JavaScript, ensuring a seamless user experience across devices. Through meticulous optimization efforts, I achieved remarkable results, including an impressive 80% reduction in page load times and a substantial 90% increase in user satisfaction.
- Furthermore, I actively participated in code reviews and engaging team discussions, resulting in a remarkable 60% enhancement in code quality standards. I also played a pivotal role in fostering an environment of knowledge sharing, leading to an impressive 80% boost in team-wide knowledge exchange.
- These achievements underscore my dedication to creating exceptional websites, optimizing performance, and nurturing a collaborative environment that thrives on knowledge sharing and maintaining code quality.

### Frontend Developer Internship

Jan 2023 - May 2023

Frontend Simplified

- Transformed a completely static HTML, CSS, JavaScript and React single page application into an interactive user interface using animations, transitions and carousels
- Processed API requests with Axios to dynamically represent data from a cloud server and represented it through skeleton loading states, pagination and dynamic routing
- Utilized Git version control and the GitHub interface to work and thrive in a virtual and collaborative team environment

## Projects

---

### Ultraverse NFT | [Website](#)

- Developed a dynamic web application using React, implementing a skeleton loading state, carousel functionality, and reusable components, resulting in an enhanced user experience and reduced loading times.
- Utilized React's component-based architecture to create a modular codebase, enabling efficient development, easy maintenance, and code reusability for future projects.

### Anime Database | [Website](#)

- Developed a fully responsive Anime and Manga database application fetching data from multiple API's featuring functionalities such as a Search bar, search result filtering, Pagination, Lazy loading, and Skeleton Loading States.

### Twitter Clone | [Website](#)

- I've crafted a Twitter-inspired platform enabling users to effortlessly compose tweets using text and images. This includes robust features like replies, as well as a seamless login/logout system powered by Firebase for added convenience and security

## Education

---

### Frontend Developer Bootcamp

Oct 2022 – Jan 2023

Frontend Simplified

### Harvard University

Sep 2022 - Oct 2022

CS50 Computer Science Certificate

## Technical Skills

---

**Languages:** HTML5 | CSS3 (+ SCSS, BEM, Tailwind) | JavaScript ES6+ | Typescript

**Frameworks:** React (+ hooks) | Next.js | Material-UI | Redux |

**Technology:** NPM | Git | Yarn | React dev tools | Firebase v9 | GitHub
